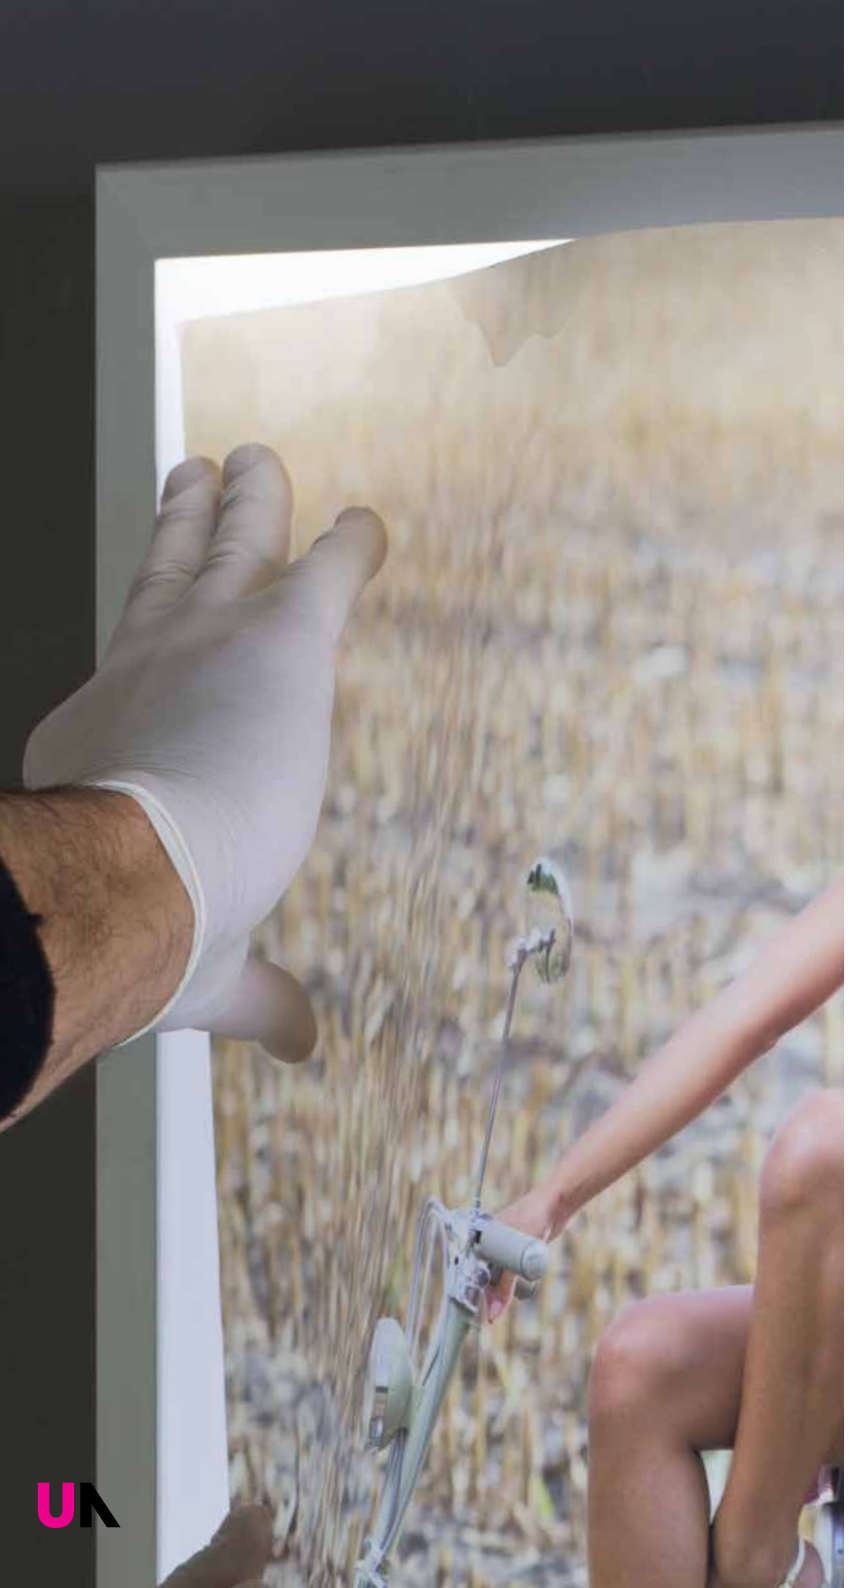
JUST 4.5 CM TO CONVEY BEAUTY

LED illuminated frames with decorative or simple profiles encompassing all of the technology needed to enhance shapes and colours. The light passes through the image, adding depth and luminosity, transforming it into a splendid decorative picture.

Attention to detail and **Italian production quality** combine with the emotional richness of colour enhanced by a light that is unique in the world

The **Unica backlit panels** have been created with the aim of revolutionising display advertising, revealing the astounding creative potential offered by backlit frames in interior design.
Production flexibility, combined with the utmost reliability of the components and simplicity of use, make products from the PH and PHF collections valuable allies for residential as much as for retail space design projects.



SPRING-FIT: DYNAMIC VISUAL COMMUNICATION

True design is that which serves a purpose, brilliant ideas that improve life concealed in an apparently simple object.
The **Spring–fit system** was created under that premise.

The system is designed to enable the replacement of images in backlit panels and frames with a push of the hand.

The backlit panel is no longer a simple advertising tool, it has become a more **dynamic and versatile furnishing element** capable of enhancing photographs and digital works of art.

PH Backlit panels collection

The new dimension of images

Design: **Cantoni**

Essential lines, minimum thickness, the image is made of passing light: the PH line allows to design dynamically-furnished spaces where light and colour provide a new imaginative dimension.

Linear and bright aluminium profiles including in just 4,5 cm all the technology needed to light the images printed on Backlite.

TECHNICAL SHEET

Unica | PH Line

STRUCTURE

6060-T5 non-deformable aluminium

. Min. size 450 mm

. Max. size 1835 mm

LIGHTED PANEL

Acrylic sheets with a high level of light emission, designed to enhance image brightness thanks to pure, high-luminosity and high-diffusivity light sources that render colours with high visual uniformity.

REAR PANEL

Composite panel made up of two aluminium sheets with a polyethylene core.

LIGHT SOURCE

. LED Strip 120/m

. Colour temperature: 5500° K

. Rated output: 9.6W per metre

. Voltage: 240 V AC

. Side on/off switch

. Integrated transformer

The light source contained in this equipment may only be replaced by the manufacturer, its service department or equivalent qualified personnel.
Device for indoor use only, IP20

The electrical output cable of the WALL PANEL is not equipped with the plug: it needs to be connected to the electrical wiring of the room.

All products by Cantoni are made in Italy with carefully selected materials.
