THE CREATIVE POWER OF A BACKLIT FRAME

The **Unica backlit panels** have been created with the aim of revolutionising display advertising, revealing the astounding creative potential offered by backlit frames in interior design.

Lighted Panels from Unica by Cantoni also boast an exclusive design – an accomplished expression of the Made in Italy brand – and encompass the best in technology.

They are free from cables and external power supply units, thanks to the integrated side switch, which makes it easy to turn the panel on and off. Unique Lighted Panels for interior use with images of the highest quality printed onto backlit film, which captivate, evoke emotions and can be replaced with a simple push of the hand, thanks to the **spring-fit system**.

Production flexibility, combined with the utmost reliability of the components and simplicity of use, make products from the **PH and PHF** collections valuable allies for residential as much as for retail space design projects. The printed image is chosen by the customer, who can easily replace the image with another whenever they wish with no need for assistance.

TECHNOLOGY AND CRAFTMANSHIP

Attention to detail and **Italian** production **quality** combine with the emotional richness of colour enhanced by a **light** that is **unique in the world** to produce the **Visual** range of panels.

The distinctive aesthetic balance, based on a combination of innovation and tradition, makes PHF Unica backlit panels perfect for use in areas intended for relaxation, where they create **pleasant and comfortable spaces**.

PHF panels are extremely versatile and timeless objects, thanks to the ease with which the image within can be replaced whenever required.

Backlit frames with decorative or simple profiles encompassing all of the technology needed to enhance shapes and colours. The light passes through the image, adding depth and luminosity, transforming it into a splendid decorative picture.

SPRING-FIT: DYNAMIC VISUAL COMMUNICATION

True design is that which serves a purpose, brilliant ideas that improve life concealed in an apparently simple object.

The **Spring-fit system** was created under that premise. The system is designed to enable the replacement of images in backlit panels and frames with a push of the hand.

The backlit panel is no longer a simple advertising tool, it has become a more dynamic and versatile furnishing element capable of enhancing photographs and digital works of art.

PHF line

Tailored backlit painting

Design: **Cantoni**

We have chosen the warm embrace of natural materials crafted with passion to delicately enclose the emotions conveyed by your most treasured images.
