THE CREATIVE POWER OF A BACKLIT FRAME

The **Unica backlit panels** have been created with the aim of revolutionising display advertising, revealing the astounding creative potential offered by backlit frames in interior design.

Lighted Panels from Unica by Cantoni also boast an exclusive design – an accomplished expression of the Made in Italy brand – and encompass the best in technology.

They are free from cables and external power supply units, thanks to the integrated side switch, which makes it easy to turn the panel on and off. Unique Lighted Panels for interior use with images of the highest quality printed onto backlit film, which captivate, evoke emotions and can be replaced with a simple push of the hand, thanks to the **spring-fit system**.

Production flexibility, combined with the utmost reliability of the components and simplicity of use, make products from the **PH and PHF** collections valuable allies for residential as much as for retail space design projects. The printed image is chosen by the customer, who can easily replace the image with another whenever they wish with no need for assistance.

JUST 4.5CM TO CONVEY BEAUTY

Attention to detail and **Italian** production **quality** combine with the emotional richness of colour enhanced by a **light** that is **unique in the world** to produce the **Visual** range of panels.

The highly technological heart of the lighted panels beats beneath clean, elegant lines. The aluminium profiles and slimline design – just 45 mm thick – make it possible to furnish and reconfigure spaces with ease creating evocative wall panels.

Clean lines, slimline design and an image created by the passage of light: the PH range of slim backlit LED panels makes it possible to design spaces furnished in a dynamic way, spaces in which light and colour present a new dimension of creativity.

SPRING-FIT: DYNAMIC VISUAL COMMUNICATION

True design is that which serves a purpose, brilliant ideas that improve life concealed in an apparently simple object.

The **Spring-fit system** was created under that premise. The system is designed to enable the replacement of images in backlit panels and frames with a push of the hand.

The backlit panel is no longer a simple advertising tool, it has become a more dynamic and versatile furnishing element capable of enhancing photographs and digital works of art.

PH line

The new dimension of images

Essential lines, minimum thickness, the image is made of passing light: the PH line allows to design **dynamically-furnished spaces** where light and colour provide a new imaginative dimension.

Panel with LED backlighting and pre-fitted wall hook. Equipped with the exclusive **Spring-fit system**, offering an easy solution for image replacement.

Standard and made-to-measure sizes.

Ideal for store display communication. Perfect to create evocative atmospheres in residential spaces. too.

Luminous linear profiles in aluminium with a thickness of just 4.5 cm containing all of the technology needed to illuminate images printed onto backlit film, which can be changed when needed with a simple push of the hand.

PH line

Design: **Cantoni**

Light that builds up an **image, reflection** that creates colours and **colours** that distinguish **shapes** to fit into the space.

The perfect gradation of light creates a comfortable and evocative atmosphere. Thanks to their distinctive modular design, PH panels are versatile objects suitable for **decorating and furnishing various environments, including residential.**

STRUCTURE

6060-T5 non-deformable aluminium

- . Min. size 450 mm
- . Max. size 1835 mm

LIGHTED PANEL

Acrylic sheets with a high level of light emission, designed to enhance image brightness thanks to pure, high-luminosity and high-diffusivity light, sources that render colours with high visual uniformity.

REAR PANEL

Composite panel made up of two aluminium sheets with a polyethylene core.

- . Easy set-up
- . Replaceable image (Spring-fit system)
- . Post-sales print service

LIGHT SOURCE

- . LED Strip 120/m
- . Colour temperature: 5500° K
- . Rated output: 9.6W per metre
- . Voltage: 240 V AC
- . Side on/off switch
- . Integrated transformer

The light source contained in this equipment may only be replaced by the manufacturer, its service department or equivalent qualified personnel.

Device for indoor use only, IP20

The electrical output cable of the WALL PANEL is not equipped with the plug: it needs to be connected to the electrical wiring of the room.

Standard Anodized Finish
